

# HOODOO MOBIL

**A few months ago, the Hoodoomobil was acquired as an old firetruck from 1972 and started refurbishing it with a PA, DJ equipment, light equipment and some decoration.**

Our vision is making a tour through Europe next year – from hosting a dance floor with our truck at festivals, organize parties, or any other fun things that fit.

Hoodoomobil's standard equipment consists of two RCF Art 310A tops and a jb-sub112h subwoofer(50-100 Pax); a db Technologies fifty-line 218 (100-250 Pax) is available, too. As for DJ equipment, we provide a Rane MP/XP 2016 mixer and two Technics 1210mk2. For an autarkic power supply there is a generator. We got a light and decoration concept which is topped off by the look of the 43 year old firetruck.

We are three DJs from Bochum, GER, and we have been djing for five years, organizing parties and events for two years. Through these years we were able to gain valuable experiences in creating a nice atmosphere and a pleasant environment, selecting suitable music and setting everything up properly for a decent party vibe. Our professionalism has been proven by previous collaborations with events like „Ruhrtriennale“ and artists like Hans Nieswandt and Ugly Drums, just to name a few. We play strictly vinyl, primarily within the range of, but not limited to, House, Disco, Funk, Soul and Techno music – fitting any situation.

**Hoodoomobil is a labour of love project: non-profit, aiming to spread good music and give people a great and unforgettable time. The journey will be covered by several platforms, such as Facebook, YouTube, and Soundcloud, ensuring a wide reach of a big audience for this unique project.**
